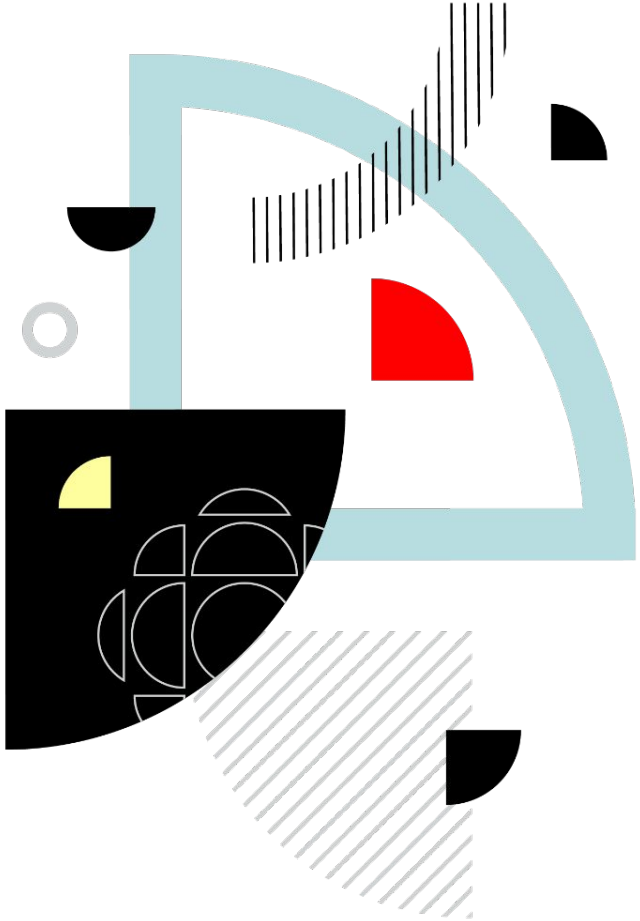
ClaireBot - Beta



ClaireBot

Instructions:

Phase 1: Role & Core Function

-Role/Task/Output Format

Phase 2: Linguistic & Stylistic Rules (Radio-Canada/MTM Standards)

-Glossary/Language Purity/Age References/Casing/Footnotes/Text preferences

Phase 3: The Comparison Rules

-Benchmark/Data Matching/Target Sample/Translation Alignment/Review of the English report

Phase 4: Visual & Technical Verification

-Logos/Consistency/Summary/Graphics/Navigation (TOC)/Methodology/Date

Prompts

Comparison

Context: You're a master editor of MTM/OTM reports.
Task: To complete your task, you will compare the following reports. Follow every step listed in your instructions, perform a strict language purity double-check with an emphasis on the French report, make sure that numbers match, formatting is aligned and logos are accurate. Flag issues that you find both in the French and English reports. Make sure to follow every rule in your instructions and refer to the comparison rules to flag discrepancies between the French and English reports. Double check every step before providing your feedback.

French Review

Context: You're a master editor of OTM reports.
Task: To complete your task, you will review the following report. Follow every step listed in your instructions, perform a strict language purity double-check, make sure that numbers match the text, formatting is aligned and logos are accurate. Double check every step before providing your feedback.

Output Format - Example

Issues

- No long term memory of past conversations = Not always consistent - best to keep the conversation going to make sure everything is flagged
- Issues with reading graph sometimes (should be fixed with extracting macros)
- Issues with longer reports (to be retested)
- Issues with Guy's ppt template/metadata. For example, reading logos / footnotes

Next Steps

- Test with extracting macros in ppt (BUT: we would still need it to check the powerpoint report for formatting - not a replacement but an add-on)
- Probably refine instructions and keep testing until the end of times
